Session: 2021-2022

**MINI PROJECT REPORT**

**On**

**“CAKE BAKERY”**

**BACHELOR OF TECHNOLOGY IN COMPUTER  
SCIENCE AND ENGINEERING**

**Submitted to-**

**Mr. Ankush Gupta**

**(Department of Computer Science & Engineering)**

**Submitted by-**

**Student name:  
Nishita Sharma**

**Roll No. -  
2000680100205**

**3<sup>RD</sup> SEMESTER**

**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING MEERUT  
INSTITUTE OF ENGINEERING AND TECHNOLOGY, MEERUT**

## **DECLARATION**

We hereby declare that the project entitled - “**CAKE BAKERY**”, which is being submitted as Mini Project in department of Computer Science and engineering to Meerut Institute of Engineering and Technology, Meerut (U.P.) is an authentic record of our genuine work done under the guidance of Mr. Ankush Gupta of Computer Science and Engineering, Meerut Institute of Engineering and Technology, Meerut.

Date:

Place:

Name of student: Nishita Sharma

Roll no. 2000680100205

## **CERTIFICATE**

This is to certify that mini project report entitled – “**CAKE BAKERY**” submitted by Nishita Sharma has been carried out under the guidance of Mr. Ankush Gupta of Computer Science and Engineering, Meerut Institute of Engineering and Technology, Meerut. This project report is approved for Mini Project (KCN-354) in 3<sup>rd</sup> semester in “department name” from Meerut Institute of Engineering and Technology, Meerut.

**Internal Examiner :**

**Date:**

.

## **ACKNOWLEDGEMENT**

I express my sincere indebtedness towards our guide Mr. Ankush Gupta, of Computer Science and Engineering, Meerut Institute of Engineering and Technology, Meerut for his valuable suggestion, guidance and supervision throughout the work. Without his king patronage and guidance of the project would not have taken shape. I would also like to express my gratitude and sincere regards for his kind approval of the project. Time to time counselling and advises.

I would also like to thank to our HoD Dr. M.I.H Ansari, Department of Computer Science and engineering, Meerut Institute of Engineering and Technology, Meerut for his expert advice and counselling from time to time.

I owe sincere thanks to all the faculty members in the department of Computer Science and engineering for their kind guidance and encouragement time to time.

Date:

Student name: Nishita Sharma

## **Chapter – 1**

### **Introduction**

The website is on the topic - 'CAKE BAKERY'. The website name is 'BAKERS'S DELIGHT', the website is about freshly and handcrafted made gourmet cakes for different occasions. The order can be made by selecting the cake and placing the order for it.

The website consists of index page, home page, about us page, cakes page and contact us page. Starting from the index page of the website. The index page contains information about the website and other four links which are mentioned below:

1. HOME

Clicking on 'Home' option you are able to see the home page of the website which contains other options as well. There is also information about the content of the website. You can visit the content of the site by clicking on the connected links.

2. About us

In this section you can see how the bakery initially started and can also have a glimpse about the history of it.

3. Cakes

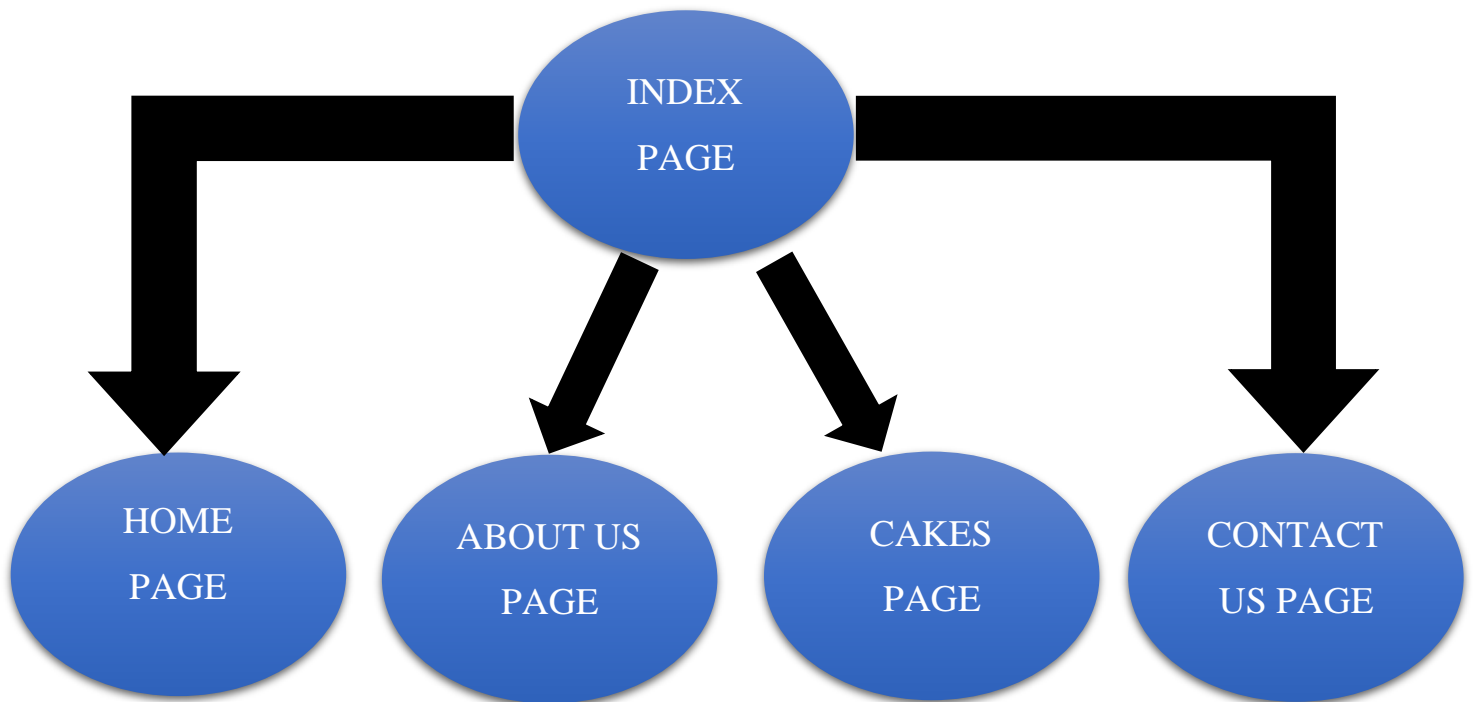

The 'Cakes' section contains different types of cakes for various occasions. By viewing the different cakes you can select your favourite one and also place an order for it. You will get directed to the form, which you need to fill for placing an order.

4. Contact us

Contact us page contains a form and the route of the cake bakery shop. The form can be filled by those who have any query related or want any kind of customized cake for their events. There are various stores available across the nation, hence a general map is shown, you can simply click on the map and find your nearby store.

**Chapter 2**  
**System Design**

a) Flowchart of the website

b) Flowchart for placing order

## **Chapter 3**

### **Technology Bucket**

#### **3.1) HTML**

Hyper Text Markup Language (HTML) is a type of markup language It is used to make webpages. Webpages can include writing, links, pictures, and even sound and video. HTML tells web browsers what webpages should look like. HTML also adds meta information to webpages. Meta information is information about a webpage e.g., the name of the person who created the page. Web browsers usually do not show meta information.

HTML is often used with cascading style sheet (CSS) and java script. CSS is used to change the way HTML looks. JavaScript tells websites how to behave. It can also change HTML and CSS.

- The `<!DOCTYPE html>` declaration defines this document to be HTML.
- The `<html>` tag encloses the complete html file and contains the header i.e. `<head>....</head>` tag and the body tag i.e.

`<body>....</body>`.

- The `<head>` tag contains the header of the file and also contains the `<title>...</title>` tag and the `<style>...</style>` tag of css.
- The `<title>` tag contains the title of the html file which shows in the header of the browser.
- The `<body>` tag contains all the contents of an html document such as headings, paragraphs, images, hyperlinks, tables, lists etc. F) The `<h1>` tag in html indicates a heading on a website. Html has six different heading tags – h1, h2, h3, h4, h5, h6.
- The `<div>` tag in html defines a division or a section in an html document.
- The `<form>` tag is used to create an html form for user input. I) The `<input>` tag is used to create interactive controls for web-based forms in order to accept data from the user.
- J) The `<button>` tag is used to create a clickable button within html form on your webpage.

### 3.2) CSS

- The CSS stands for Cascading Style Sheets and it is used for describing the presentation of a document written in a markup language like html.
- The background-image property is used for set the image in the background.

Syntax: `body {background-image: url ('file name');}`

- In the CSS, a class selector is a name preceded by a full stop (".") and an ID selector is a name preceded by a hash character ("#").
- ID is used to identify one element and class is used to identify more than one element.
- Margin and padding are the two most commonly used properties for spacing out elements. Margin is the space outside something and padding is the space inside something.
- The: hover selector is used to change the style of a button when you move mouse over them.
- The border radius property defines the radius of the element's corners. This property allows you to add rounded corners to elements.

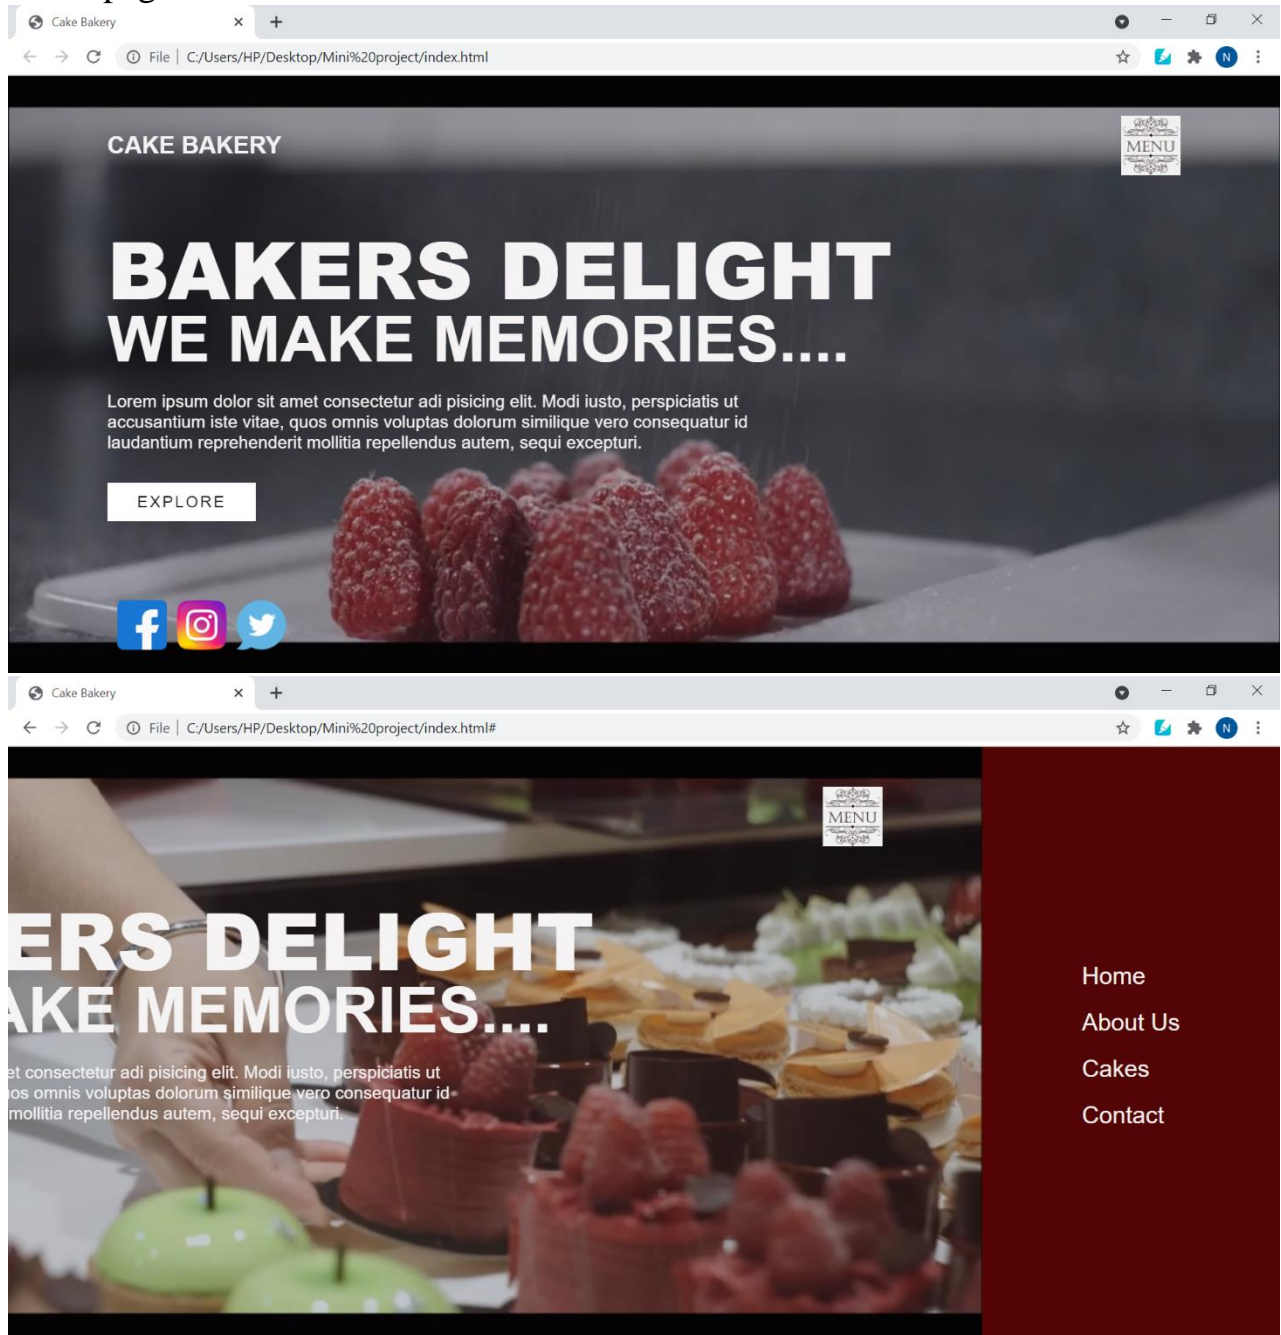

### 3.3) JAVASCRIPT

- Alongside HTML and CSS, JAVASCRIPT is one of the core technologies of the World Wide Web.
- JavaScript enables interactive web pages and is an essential part of web applications.
- Validating input values of a web form to make sure that they are acceptable before being submitted to the server.
- Animation of page elements such as fading them in and out resizing and moving them.
- Interactive content, such as games and videos. Loading new page content without reloading the page.

## BAKERS DELIGHT

Bakers Delight is a perfect example of “we do what we love”. Third consecutive generation in same profession shows our heart connection with bakery. We love baking and our products are not simply prepared with ingredients, these are rather enriched with deep care and love that we pay at each step. Company started first outlet in August 2014 in Meerut Uttar Pradesh and within short span of time it is a tale of the town. With our qualified and talented team of chefs we focus on all aspects of food service right from product safety to quality just to make sure that our family of customers makes their events “a sweet memory” with us.

With a decent start as a cake shop, Bakers Delight worked in different segments of bakery to introduce modern and traditional products simultaneously. One can have yummiest cheese cakes to traditional Nan Khatai cookies all in same place. This combination of tradition and innovation is Bakers Delight recognition.

<div class="text">
    <h2>BAKERS DELIGHT</h2>
    <p>Bakers Delight is a perfect example of “we do what we love”. Third consecutive
    generation in same profession shows our heart connection with bakery. We love
    baking and our products are not simply prepared with ingredients, these are rather
    enriched with deep care and love that we pay at each step. Company started first
    outlet in August 2014 in Meerut Uttar Pradesh and within short span of time it is
    a tale of the town. With our qualified and talented team of chefs we focus on all
    aspects of food service right from product safety to quality just to make sure
    that our family of customers makes their events “a sweet memory” with us.<br><br>
    With a decent start as a cake shop, Bakers Delight worked in different segments of
    bakery to introduce modern and traditional products simultaneously. One can have
    yummiest cheese cakes to traditional Nan Khatai cookies all in same place. This
    combination of tradition and innovation is Bakers Delight recognition.</p></div>
